## The recommended configuration for the Panda Scanner series is as follows

| Recommended computer configuration |  |
| :--- | :--- |
| CPU | Intel i7-12700H or above |
| RAM | $16 \mathrm{G} / 32 \mathrm{G}$ |
| Hard disk | 512 GB SSD or above |
| GPU | RTX 3060 or above |
| Operating system | Windows10/11 64bit |

(1) The computer must be equipped with an independent graphics card, and it is necessary to ensure that the memory of the graphics card is more than 6GB, and our software does not support AMD graphics cards at present.
(2) The CPU for Intel is recommended, but the AMD is not support.
(3) We recommend using a laptop designed for gaming or using a workstation, but not a light or office laptop. Computers not powered by Windows such as Mac is not support too.
4. At the same time, Panda Smart has higher CPU requirements and we recommend using 17 12th generation or more advanced CPUs to achieve a best performance.
